Cibola Trail Rangers
Hello everyone,

Wow! That was quite the work session on Lower Cienega by the FOSM CREW. I'd quit after lunch too :) I hope the beverage truck showed up for you that afternoon!!

I have spent time comparing Galbraith's and Browning's photos and reports and I have updated the tree report to the best of my abilities. The tree on upper Canoncito is a maybe, so not put on report. The one that had been up there (a leaner over the trail) David reworked by clearing the ground to the side of the tree and putting the debris under the tree---smart move. I don't walk under stuff like that! Since that tree is now SAFE, I have removed it from the list. All the trees the FOSM CREW removed on Monday appear to be from the Cienega PA KIOSK (TH) to the Faulty/Cienega Wilderness boundary. That leaves the 2 trees that Galbraith reported on Cienega in the Wilderness. Since he reported those on 4/12, maybe more have fallen :>(

Take care out there!

Sally Lowder
